Experience

Restop Serbia, October 2022 - December 2022
- Learned how to organize and refactor legacy code
- Fixed bugs, made adjustments to responsive design
- Made full responsive single page website using React and mui

Salestrekker, December 2022 - October 2023
- Worked successfully in a team
- Worked on a massive web app
- Implemented dark theme, took care of creative decisions
- Worked closely with the back end team on testing endpoints, enums, implementations
- Created hooks, made adjustments to the ones already written
- Created new components
- Learned about testing the edge cases, being thorough with my code
- Used many libraries, learned how to study documentation thoroughly

About me

I am an experienced frontend web developer looking for new opportunities to grow my experience in a stimulating environment, and add value to it. I am creative, hard working, quick to learn, resourceful, and I have strong communication skills.
I enjoy solving crossroads, writing poetry, and listening to Led Zeppelin.
